Video script text (7-22-16)

Readings in Moodle can contain text, images, multimedia clips and even files that relate to the reading. There are two types of Moodle Readings: Pages and Books.

To read a page, click on the page link on the course main page. You will be taken to the page where you will see the text of your reading. When you are finished reading the page, click the course link at the top of the page.

To read a book, click on the book link on the course main page. This will take you to the first chapter of the book. **Use the navigation arrows to move forward and back in the book, or navigate to a specific chapter in the book by clicking on the link in the table of contents block.** When you finish reading the book, use the up arrow in the last chapter to return to the course main page.

You are welcome to print the materials in Pages and Books for future reference and study. To print a page, use your browser's built-in print function. Books can be printed by clicking on the print links in the Administration block inside the Book.
